

Bug fix 1.0.

To apply the fix of the bug, follow the following procedures.

1. Download the “**Check-up Business Solution.zip**” and “**Database schema update.zip**” from <http://jhunexjun.hostei.com/check-up/>.
2. Unzip the 2 files to your desired location by right-clicking it.
3. Go to “C:\Program Files\Check-up\” or maybe it is located in “D:\Program Files\Check-up\”.
4. Overwrite your current “Check-up Business Solutions.exe” with the unzipped file having the same filename.

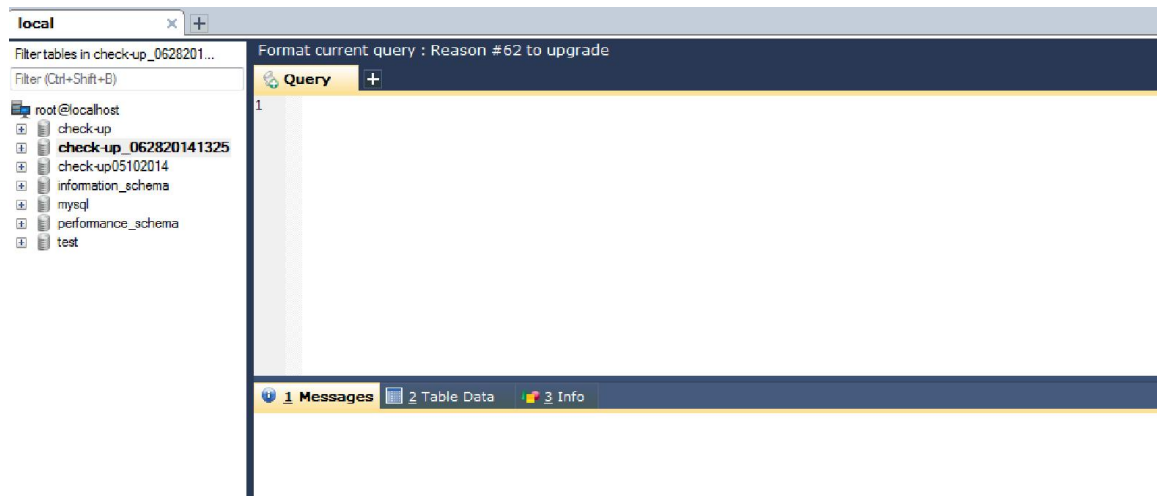

Then after that

1. Open “SQLYog Community” which can be found in your Start > All Programs.

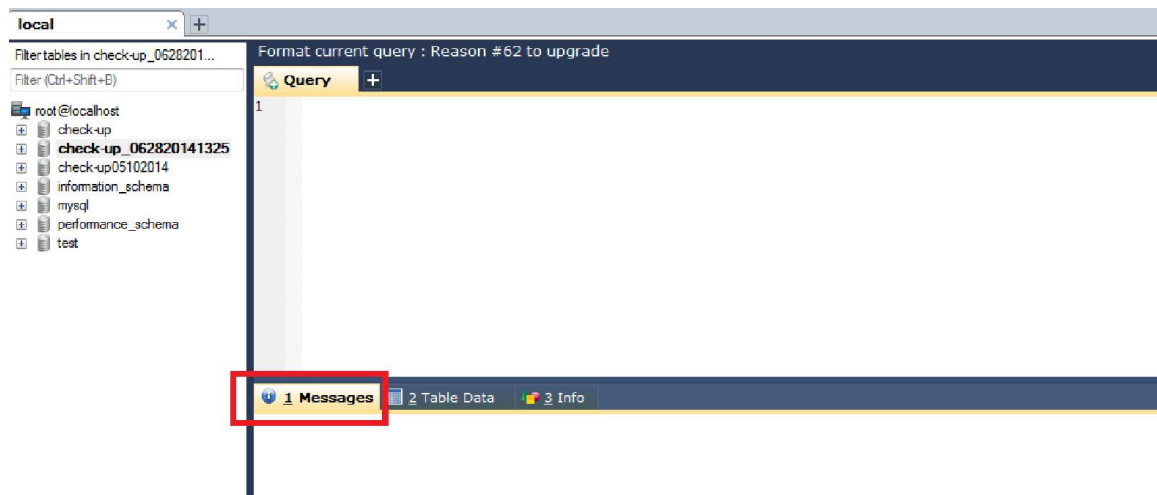

2. If it doesn't have username and password type in “admin” and “c43ckup2014” as your password. Click Connect button. You will be logged in.
3. On the left side pane, click “check-up05102014”.

4. Then open the downloaded and unzipped file “update_0schema.sql”. Copy the entire text and paste it to the right side white pane.

5. Highlight the entire text with pressing “CTRL+A” in your keyboard then press “F9”.
6. Wait until it finished running.
7. Once finished, at the lower right pane under the tab “Messages” copy the entire message and send it to jdream_catcher@yahoo.com – my email address.

8. You must be done. Run the application and check if the amounts have now been corrected.
